

# Configure Cabinet Door Panels

[cadimage.zendesk.com/hc/en-us/articles/204957716-Configure-Cabinet-Door-Panels](https://cadimage.zendesk.com/hc/en-us/articles/204957716-Configure-Cabinet-Door-Panels)

To configure the door panels of your cabinet:

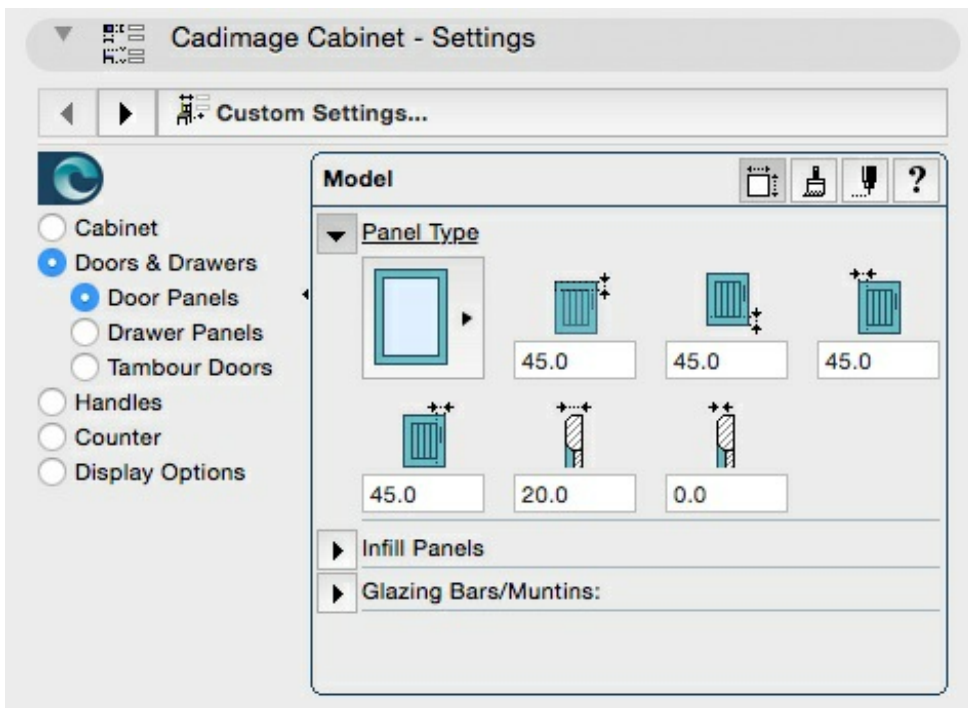

1. Open the Cadimage Cabinet **settings** dialogue
2. **Choose Doors & Drawers** from the menu:

3. Under the **Panel Type** twirl-down, you will see a button which will let you change the panel type (in the image above the Flat Panel option is selected).

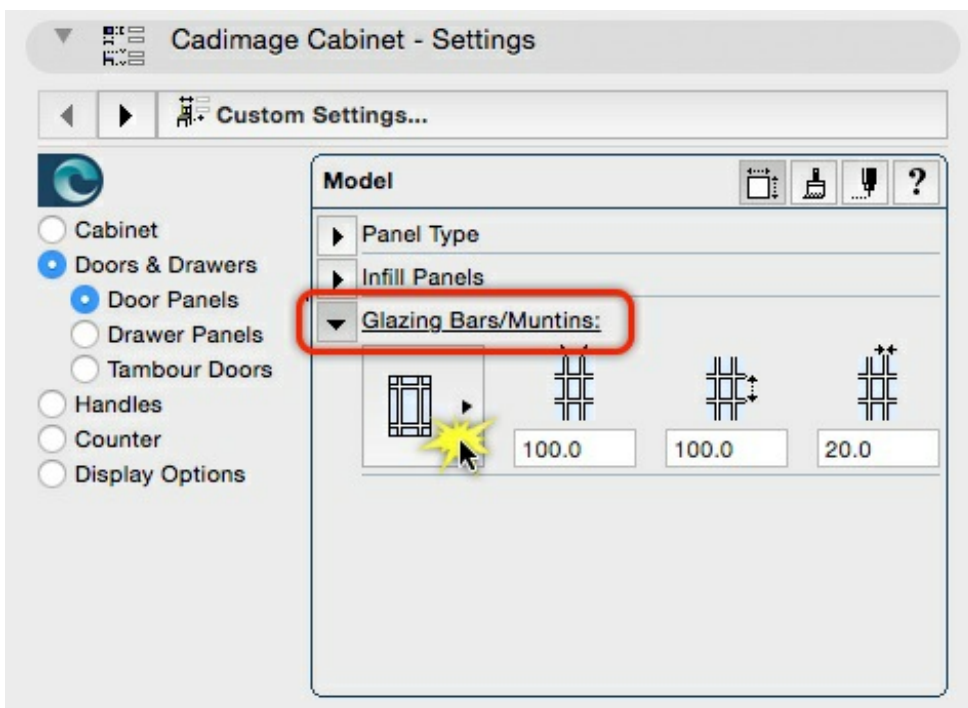

#### 4. **Choose** your desired **panel type**

*Depending on which Panel Type you choose, you will see different parameters that will let you customise the panel. In the image below we have chosen the 'Frame 1 + Glass panel'.*

**TIP:** If you choose a panel that has glazing, you will see an additional twirl-down item called 'Glazing Bars/Muntins' (shown above).

5. Select the **Glazing Bars/Muntins** twirl-down (if it is available to you):

6. Choose your **preferred glazing style**:
