

# How to create a corner cabinet

 [cadimage.zendesk.com/hc/en-us/articles/205263233-How-to-create-a-corner-cabinet](https://cadimage.zendesk.com/hc/en-us/articles/205263233-How-to-create-a-corner-cabinet)

In this tutorial we show you how to create a corner cabinet like the one shown below, using the Cadimage Cabinets tool.

To do this:

1. Click the **Cabinet Tool** in the **ARCHICAD Toolbox**
2. Choose the **Cadimage Cabinet** from **Linked Libraries> ARCHICAD Library 19** folder
3. Go to the **Cadimage Cabinet – Settings** panel
4. Choose **Cabinet > Shape** from the menu area on the left of the panel:

5. Click on the **Cabinet Shape** button highlighted above

You should now see the following four options:

- **Cabinet Front** (this is the door or drawer fronts only, no carcass or counter)
- **Rectangular**
- **Interior Corner**
- **Exterior Corner**

6. Choose **Interior Corner** from these options

TIP: Change to the **Exterior Corner** option to see how the associated dimensions change:

**TIP:** You don't have to use a fixed 90 degree corner - use the very last option shown above to set your own angle.
